SUMMARY

Los Angeles-based design engineer and founder with 20+ years in design, UI/UX, and front-end development. Hand-built a \$3.8M apparel brand, production B2B fulfillment software, and a consumer golf app — now building agent-native brand operations in Next.js.

EXPERIENCE

Margenie — Founder · Design Engineer 2024 – Present

- Building agent-native ops platform for Shopify brands: profit metrics, Meta ad diagnostics, in-chat creative workflows
- Designed Ops design system (shared components, style guide) across Ad Ops and Supercomputer chat
- Built Supercomputer agent layer: playbooks, ranked fixes, streaming tools, human-in-the-loop approvals
- Generative creative for ad refresh via fal.ai (Nano Banana 2, Seedance 2) — approval-first, not auto-publish
- Stack: Next.js, React, TypeScript, Prisma, Meta Graph API, Shopify API, Vercel

Takeout Order — Founder · Designer · Operator 2020 – Present

- \$3,788,518.88 gross sales since Jan 2020 — hand-drew full catalog, owned marketing and DTC operations
- Directed brand identity across web, paid social, and email; iterative performance creative testing
- Built internal fulfillment software when scale broke manual workflows

Fulfillment portal — Product · Engineering 2019 – Present

- B2B web portal for print partners — Shopify ingest, EasyPost labels, order state machine
- Production on AngularJS + Firebase; maintained while shipping greenfield Next.js products

Parfade — Founder · Product · iOS 2023 – Present

- iOS app for golfers — round scheduling, side games, real-time chat, push notifications
- Stack: Expo, React Native, Next.js API, Drizzle, Neon Postgres, Ably
